Do you know why we should protect our earth and how we can save our earth? We people care about ourselves and do lots of damages to our earth. If we can cut down fewer trees, we can protect our earth from being damaged. When it rains heavily, we don't need to worry about landslides. Then, the house won't move from the top of a mountain to the bottom of it. If we can take more public transportations or share a taxi, we can keep the air cleaner. If we can bring our own shopping bags and bring our own spoons and chopsticks, we can help reduce trash. If we can eat less meat, we can not only have a healthy body but do less damage to our earth.

The earth gives us fresh air, clean water, lots of resources and a comfortable place. Without it, we can't live. It's just like our mother. We can't find any place like it, so we should love and protect it because we only have one earth.

On February 29, Andy Jones will celebrate his 15th birthday. He will be 60 years old this year. How is that possible? Because Andy was born on February 29, "leap day." Leap day only happens on "leap year". It only comes once every four years. In fact, it is a way to make our calendar more accurate.

February usually has 28 days and we have 365 days in a year. But the problem is that the earth always takes a little more than 365 days to go around the sun in a year—about 6 hours more, that is, one fourth of one day. So we have one more extra day every four years and it is added to February. That's why we have February 29 every four years.

As to Andy Jones, he thinks it's special to be born on such a day. He doesn't mind only having his birthday once every four years because he likes to think it helps to keep him young.

 born 出生	possible 可能的	leap year 閏年
